

## Human Chorionic Gonadotropin (HCG) Diagnostic Kit

HCG (human Chorionic Gonadotropin) is a glycoprotein hormone secreted by the developing placenta shortly after fertilization. In normal pregnancy, HCG can be detected in serum as early as 7 days following conception. The concentration of HCG frequently exceeds 100mIU/ml by the first missed menstrual period and peaking in the 15-200,000mIU/ml ranging from 10-12 weeks into pregnancy.

## Clinical Use of **Best Home HCG Test**

Diagnosis of pregnancy

To know the development condition of embryo and fetus
Assistant diagnosis of ectopic pregnancy and threatened abortion
Tumor diagnosis and treatment monitoring of sertoli cell

## **Parameters**

Specimen	Urine/Serum/Plasma
Specimen volume	80µl
Cut off	25mIU/mI
Linear range	25-2000mIU/m
Precision	CV<15%
Accuracy	Relative deviation <20%
Interpretation time	10min
Test time	15s
Comparison	Compared with Beckmancoulter Access CLIA analyzer, linear correlation R <sup>2</sup> =0.922, P<0.05, with significant agreement

## **Application**

Outpatient Clinic, clinical laboratory, Gynecology Dept
